

## AUXILIARY LIGHT

The SEAMOR Marine Auxiliary Light is an easily-installed and positional independent light source. This compact unit will light up even the darkest corners of the deep. With a 125 degree beam angle and Cool White LEDs it allows objects to be seen just how nature intended. Great for task specific operation or used in conjunction with the vehicles main lighting to remove shadows. All SEAMOR Marine vehicles come with ports to plug in two Auxiliary lights in as standard. The

same rugged and durable design that SEAMOR put into its ROVs has been incorporated in to the Auxiliary Light. All aspects of the light are pressure tested to 600 metres. The entire unit is serviceable by SEAMOR or an authorized dealer. A full one year limited parts warranty is provided, and further servicing can be specifically targeted to the segment effected, such as the electronics or light module without having to replace the entire unit.

### BENEFITS

- > High impact Sapphire window
- > Low power requirements with wide voltage range
- > Cool White LED lighting
- > Compact & lightweight 120g in air, 65 in water
- > Serviceable by SEAMOR or authorized dealer
- > Easily mounted to ROVs or even dive helmets

### DIMENSIONS

- > Diameter: 40mm
- > Length: 60mm (Not including connector)
- > Weight in air: 120g
- > Weight in water: 65g

### MODULE ATTRIBUTES

- > 1000lm on/off control
- > 125 degree beam angle
- > Industrial sapphire window
- > 6500k cool white colour temperature

### TARGET INDUSTRY USES

- > Aquaculture
- > Forensics/search & recovery
- > Hydro dam inspection
- > Marine security
- > Pipeline inspection
- > Potable water reservoirs
- > Recreational
- > Marine research
- > Structural analysis
- > Salvage operations

### POWER

- > Input Voltage: 24-48 Vdc
- > Power consumption: 10W 48Vdc

### ATTRIBUTES

- > Serviceable: Yes
- > Connector: Marshall 26-5MBRA-1
- > Depth Rating: 600M
