

TETHER REELS

SEAMOR Marine manufactures its own line of durable, high-quality reels for tether management and storage. Made from high grade aluminum and stainless steel, our reels can accommodate a variety of tether sizes, slip rings, and incorporate waterproof hub enclosures for tether interface electronics (i.e. fiber optic

receivers, multiplexors, etc). Reels can be supplied open or securely mounted in a rugged Pelican case. A lightweight and compact option for your SEAMOR ROV or to meet your custom tether management needs, a SEAMOR Manual Reel can be counted on for years of reliable performance in any environment.

340 REEL
