

Advanced Underwater Insight. Sustainable Research Outcomes.

OCEAN RESEARCH is one of the fastest-growing and most critical fields of study today. Despite covering over 70% of our planet, our oceans and waterways remain among the least explored frontiers in our world. At SEAMOR, we are dedicated to advancing the study of oceans, lakes, and other vast bodies of water by continuously innovating to meet the demands of modern exploration.

Our modular, customizable ROVs are designed to adapt to diverse missions - from sampling and research to surveying. But we don't stop there. With versatile products like the Sturgeon 200 Thruster and Multi-Use Gripper, we go beyond ROV design, creating components that can be seamlessly integrated into your own systems enhancing custom made ROVs, AUVs, USVs and more.

Our team at SEAMOR utilizes over 18 years of experience to deliver reliable solutions for reasearch applications. Every product is built from high-grade materials to ensure long-lasting performance, helping your missions generate meaningful results for decades.

Designed for real world demands. Choose SEAMOR to detect problems before they escalate — helping you protect marine ecosystems while keeping your operations sustainable and compliant.

The dual function gripper is a plug and play style attachments that can hold various sets of jaws adaptable for your research.

The Sturgeon 200W Thruster delivers the perfect balance of power, precision, and efficiency.

See More, Do More, Protect More.

The Chinook is a modular ROV built for versatility in research. Designed to support a wide range of scientific tools and sensors, you can customize it for every new discovery.

CHINOOK

Depth Rating 300m - 600m

6 Thrusters

Digital Video Recording (DVR)
Auto Depth + Auto Heading

Size (L x W x H)
686mm x 384mm x 406mm
(27" x 15.1" x 16")

Weight in Air 33kg (72lbs)

Top Side Power Supply

Cabling 500m standard (longer options available)

Video feed Multiple HD video

SEAMOR two year warranty and lifetime service commitment

Speed 3 knots above and below surface

Extensive range of available attachment options

Dual Function Gripper

Auxiliary Lights

Auxillary Cameras

100+ third party sensors and attachments

Join the growing list of marine leaders who trust SEAMOR to work as hard as they do.
